

My Top 10 Predictions for 2026

These predictions represent a convergence of visions, patterns, and global shifts. One event triggers another in unexpected ways—a butterfly effect across geopolitics, technology, nature, and consciousness. This isn't about isolated incidents; it's about how everything connects.

Pacific Ring of Fire Megaquake

A major seismic event looms on the Pacific Ring of Fire. The vision remains persistent—possibly within months. Recent earthquakes across Taiwan, Japan, Alaska, Mexico, and Russia align with this pattern. The July 29 quake showed unusual characteristics that troubled geologists and seismologists.

This isn't just geology—it's finance, logistics, and geopolitics converging. A major Ring of Fire earthquake can disrupt ports, shipping routes, power infrastructure, undersea cables, and coastal manufacturing hubs. Even if cables survive, insurance markets panic, supply chains stall, and governments shift into emergency mode.

Ring of Fire — Active Seismic Zones (Dec 2025)

Simultaneous activity across multiple subduction zones indicates a system-wide stress cycle.

Geoengineered & Unusual Weather Events

Weather patterns are becoming increasingly abnormal and targeted. Evidence suggests something beyond natural phenomena at play—from unusual earthquake characteristics to suspicious flooding patterns.

Atmospheric Rivers

Flooding impacting the Pacific Northwest with disaster declarations and infrastructure damage

Bomb Cyclones

Winter storm systems disrupting logistics and power grids across multiple regions

Extreme Heat Domes

Driving unprecedented grid strain and widespread power outages

Catastrophic Floods

Texas-style deluges causing multi-billion-dollar damage with suspicious targeting patterns

Underwater Warfare Intensifies

War is moving beneath the waves. The vision of submarines and the year 1869 connects to today's undersea cable warfare. Russia's Yantir spy boat with submersibles can cut cables that carry 95% of international data traffic.

Orcas and killer whales capsizing ships off Portugal's coast—more incidents this year than in recorded history. The Baltic Sea hosts massive underwater military facilities testing sonar weapons that drive marine life mad, such as killer whales and orcas.

1869: Suez Canal Opens

Birth of modern naval geopolitics and undersea telegraph cable warfare

2025-2026

Undersea cables carry global data; sabotage becomes deniable hybrid conflict

1

2

3

Cold War Era

Submarines become invisible deterrent; undersea sensors evolve

Why War Moves Underwater

"Modern war isn't about explosions—it's about pressure. Under the ocean live the cables, the trade routes, the energy lines, and the communications that keep the world running. The ocean is where conflict can happen quietly, ambiguously, and deniably."

U.S. Submarine Investment

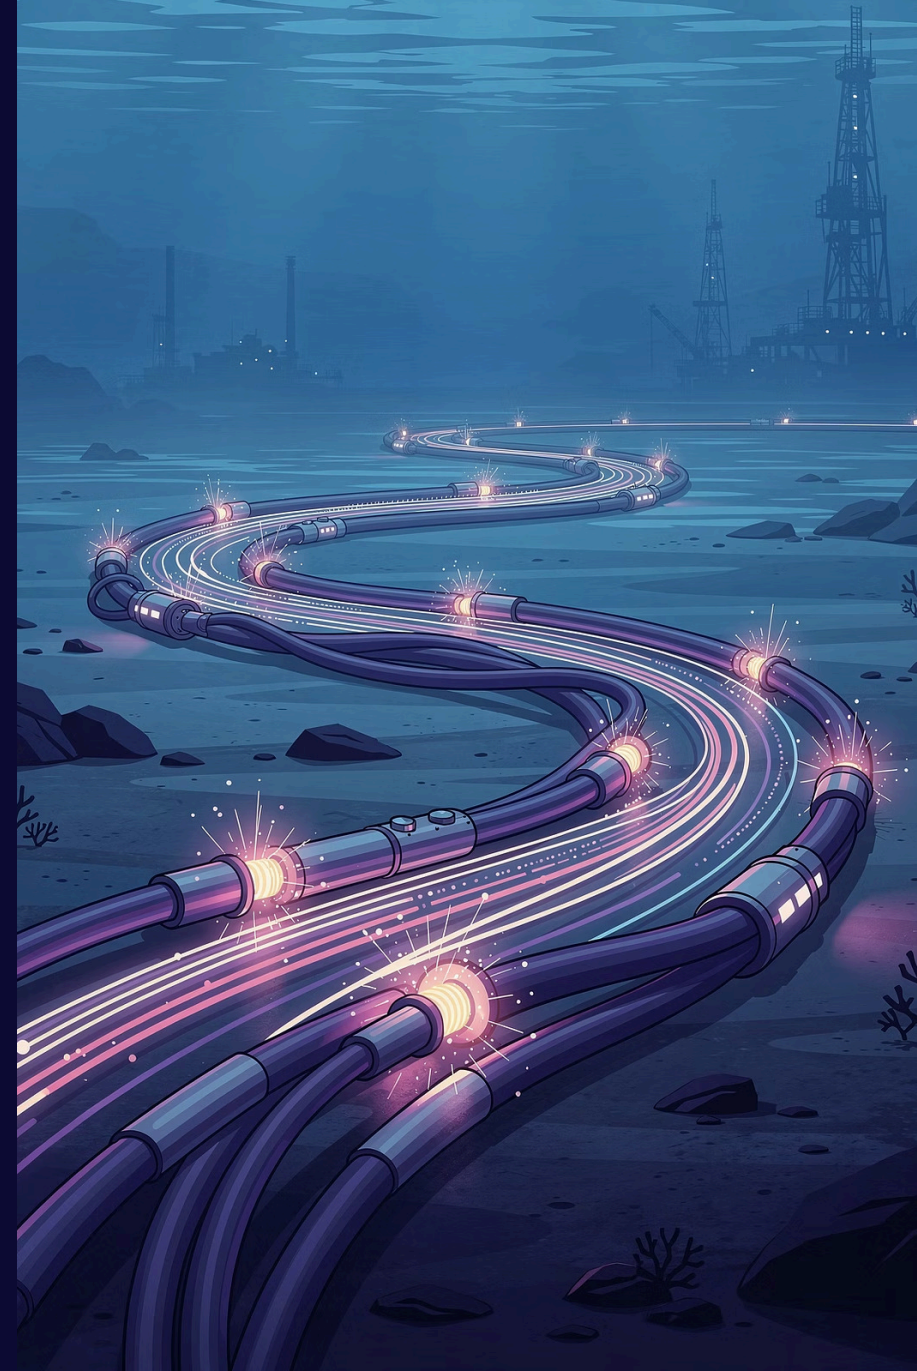

FY2026 budget allocates \$11.078B for two Virginia-class submarines. General Dynamics received \$12.4B contract modification, potentially rising to \$17.2B.

China's Naval Expansion

Massive submarine fleet buildup to control trade routes and project power in contested waters.

Russia's Poseidon

Nuclear-capable underwater weapon system designed as leverage and deterrent in undersea conflicts.

PREDICTION #4

Rotating Door of World Leaders

December 2024 prediction: a rotating door of world leaders. South Korea's president declared martial law and was replaced. Justin Trudeau stepped down in February. Pope died April 21—two days after reiterating more changes coming. Nepal, Venezuela, and U.S. leaders including Marjorie Taylor Greene, Nancy Pelosi, and Mitch McConnell stepping aside. Madami elected.

01

Prince Charles as King

Royal family transformation continues with Andrew's banishment and family splits deepening

02

JD Vance as President

Leadership transition in the United States as political landscape shifts dramatically

03

Global Leadership Turnover

Four U.S. senators won't run in 2026; former prime ministers ruling out returns worldwide

Across the U.S. and globally, an unusual number of senior leaders are stepping aside simultaneously. This isn't chaos—it's a handoff. When this many exits align, new leadership rises quickly.

PREDICTION #5

Financial Collapse/Change

Predicted in 2024, unfolding in 2025.
Historic rise of gold and silver.
Stablecoin adoption accelerating.
Federal Reserve in panic mode.
Sometimes you must burn it down to
build it up.

This convergence includes
geophysical events, tariff wars, rising
unemployment, inflation, housing
freeze, money printing, and
cloud/cyber sabotage. Everything
aligning for major market disruption.

Gold moves when confidence breaks. Silver moves when the system needs the metal to keep the future running. Government bonds no longer perceived as safe—major funds and central banks prefer gold.

\$5K

Gold Price Target

Analyst projections amid persistent
inflation and currency crisis concerns

6%

Silver Retrace

After CME raised margins to "stop
speculative buying"—same tactic used
with Bitcoin in 2017

Cyber War & Cloud Vulnerability

An indescribable surge in phishing, scams, and credential theft. Criminals becoming more sophisticated. Vision of "mechanical system outage" persists. This year alone: AWS, Microsoft, Cloudflare, ChatGPT, X—billion-dollar tech companies hit with major outages.

Cloud Fragility

The world depends on a small number of providers. One configuration mistake ripples globally.

Ransomware Threats

Data doesn't disappear—but purposeful deletion, misconfigured backups, and ransomware are real.

Grid Vulnerabilities

Blackouts from earthquakes, solar flares, or pole shift. Periods of darkness ahead.

 **Critical Action:** Back up your data offline! Keep backups of essential documents, account numbers, and insurance docs in non-cloud storage.

Why Cyber Outages Matter Now

"The system is efficient, but not resilient. We've built civilization on a small number of single points of failure."

Most big outages aren't hacks—they're configuration mistakes, DNS failures, cascading dependencies, or software rollouts gone wrong. But the implication is bigger than blame.

Banking Systems

Financial infrastructure dependent on cloud providers for transactions and data

Healthcare Networks

Patient records, scheduling, and critical care systems vulnerable to outages

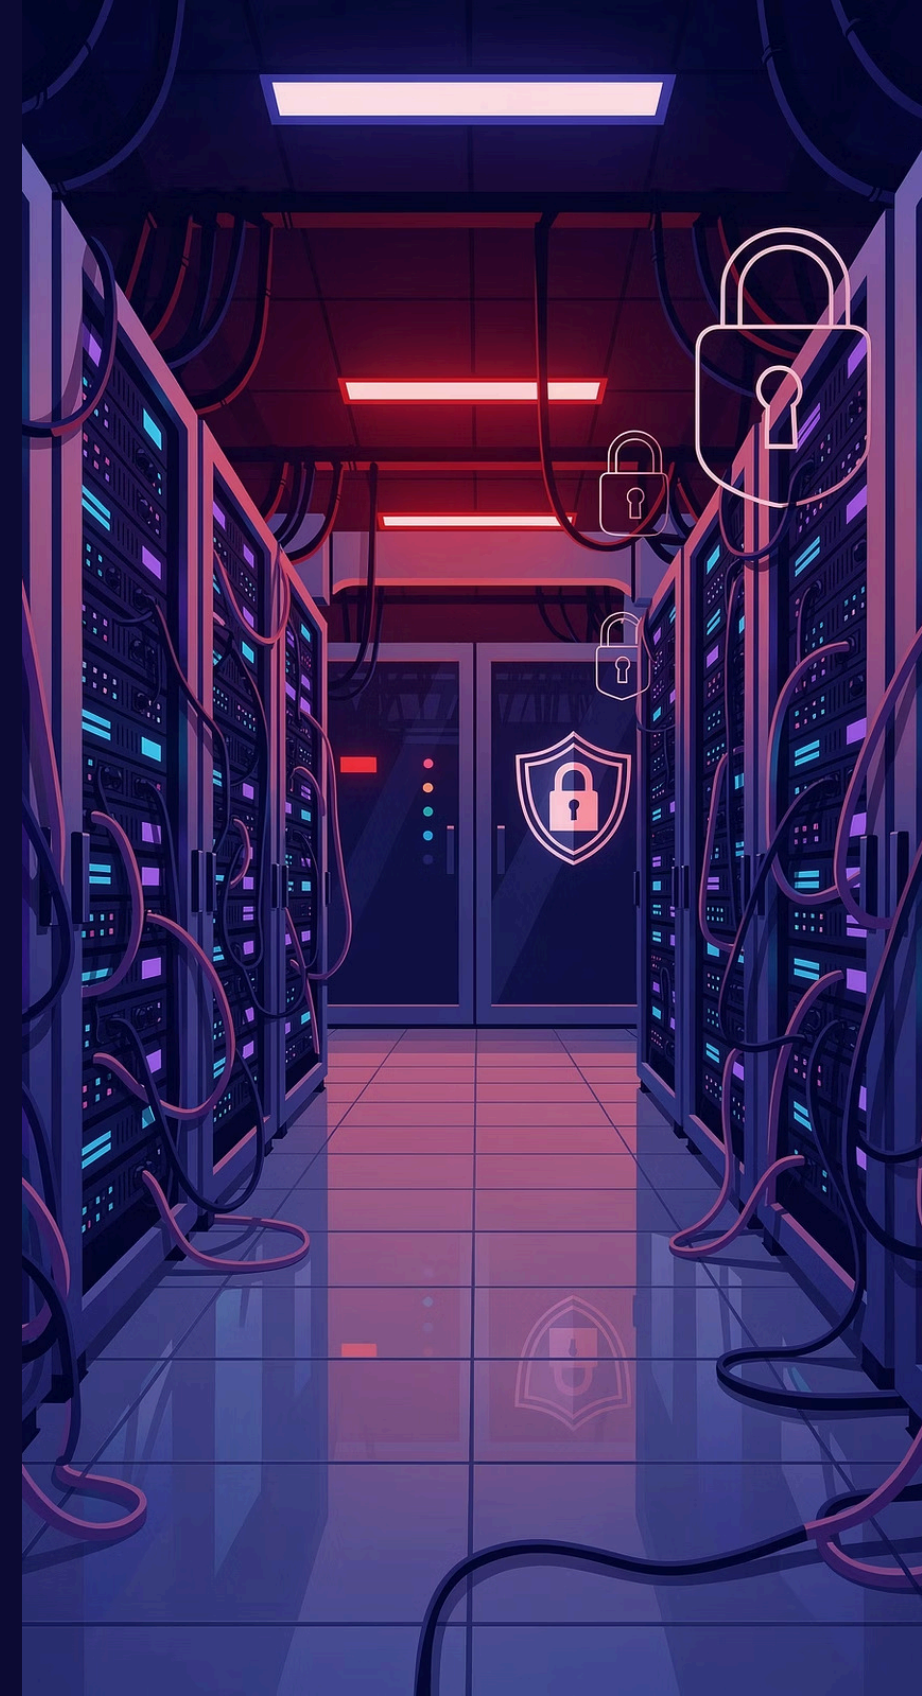

Logistics & Supply

Global supply chains rely on real-time data and communication networks

Government Portals

Essential services and citizen data managed through centralized cloud systems

Revolutions, Protests, UAPs & Whistleblowers - DISCLOSURE

This goes beyond marching in the streets. People reaching boiling points over laws, government officials, and environmental issues. 2026 is the year of whistleblowers—truths surfacing with nowhere to hide.

Public Forcing Guardrails

Not elected officials—they're bought. Citizens demanding accountability and transparency.

Digital ID Reality

Already exists with Real ID in U.S. The battle is over privacy protections and government overreach.

Major Revelations

Epstein files requiring 400 lawyers across 4 departments. 5.2 million pages under DOJ review.

Misinformation & Information Overload

Our digital landscape is increasingly saturated with information, often making it difficult to discern truth from falsehood. This phenomenon is driven by a confluence of factors, from the rapid advancement of AI-generated content to shifts in social media dynamics and a pervasive pursuit of clicks and attention.

AI-Generated Content

Deepfakes, fake articles, and synthetic media are flooding platforms, blurring the lines of reality and making credible information harder to verify.

Leadership Deception

Politicians and public figures are increasingly using sophisticated manipulation and outright falsehoods, eroding public trust in authoritative sources.

Social Media Chaos

Algorithm changes, unstable verification policies, and platform instability contribute to a chaotic information environment where false narratives can spread rapidly.

Attention Economy

The pursuit of virality and engagement often incentivizes creators to prioritize sensationalism over accuracy, fueling a constant demand for clicks.

A notable example of persistent misinformation is the false claim that Ghislaine Maxwell's father owned McGraw-Hill (the publisher). This claim spread widely despite being entirely untrue; he never owned McGraw-Hill or McNally publishing.

Consciousness Expansion & New Realities

Expansion so profound that previously unthinkable concepts won't disturb us—like clones. Remember when no one could imagine a two-year global lockdown? In 2026, the craziest thing won't seem so crazy.

Neural Systems

Non-local correlations in physics-adjacent neuroscience research

Time Perception

Brain as prediction engine—predictive processing studies advancing

Psychic Senses

People awakening to abilities beyond five physical senses—clairsenses emerging

Awareness Studies

Anesthesia research revealing what consciousness shuts off versus what persists

Those relying solely on five senses—which can be easily deceived—will struggle. Awakened individuals using psychic senses will navigate this transformation successfully.

The Year of Trials & Justice

Justice is coming in 2026. No more hiding for anyone. Multiple high-profile trials expected as truth surfaces and accountability arrives.

Epstein Files

DOJ reviewing 5.2 million pages requiring 400 lawyers across 4 departments. Obvious stalling—they could release without redactions.

Luigi Mangione

Accused of killing UnitedHealthcare CEO Brian Thompson. Facing charges in NY, PA, and federal. Pretrial hearings continue 2026.

Rex Heuermann

Facing charges in deaths of seven women including Gilgo Four. No trial date set yet.

Nicolas Maduro

Captured after Caracas attack. Trial in NY for Maduro and wife as Trump claims U.S. will run Venezuela.

The Convergence: Not One Thing, But Everything

"My 2026 prediction is not one thing. It's a convergence. Cyber stress, undersea stress, solar stress, and financial stress all stacking."

Major cloud companies with billion-dollar security budgets going down simultaneously. Solar maximum peaking—storms degrading satellites and GPS. Geopolitical tension and undersea cable vulnerability creating the blueprint for modern warfare.

Geophysical

Ring of Fire megaquake disrupting ports, trade, insurance, markets

Undersea War

Flow disruption—not tanks but control of data, energy, trade routes

Cyber Warfare

Cloud outages, ransomware, credential theft accelerating

Supply Chain

Medicine shortages, food localization, logistics disruption

Solar Maximum & Satellite Vulnerability

Solar maximum isn't a "maybe"—it's a real cycle peaking now. Strong solar storms degrade GPS accuracy, HF radio used by aviation and maritime, satellite communications, and power-grid stability.

When you combine increased solar activity with cloud dependency, geopolitical conflict, and undersea cable vulnerabilities, disruption won't need a bullet. It will look like outages, signal loss, and economic slowdown.

Data Traffic

Percentage of international data carried by undersea cables

Generic Drugs

Sterile injectable drugs dependent on APIs from India or China

Military Conflicts & Power Disruptions

Power outages in Moscow and Kiev as drone war continues. We're witnessing a live, futuristic aerial drone war—would have been "conspiratorial" years ago. Trump captured Maduro after Caracas attack, claiming U.S. will run Venezuela until "safe transition."

Moscow Blackout

4-hour power outage
December 30th amid
escalating drone warfare

1

Venezuela Invasion

CIA behind dock strike; Trump
announces U.S. control of oil
industry

3

Ukraine Targets Moscow

Drone strikes on Russian
capital; 1M Kyiv households
lose power

2

Department of War

Rebranding Defense
Department sends clear
message: U.S. at war with
everybody

4

Billionaire Land Acquisition Patterns

U.S. billionaire land acquisition matches psychic visions. Gates owns 275,000 acres, Bezos 460,000 acres. Most U.S. land still owned by families and foundations acting as stewards—Emerson (2.5M acres) dedicated to forestry, Malone (2.2M acres) to sustainable food.

Billionaires targeting Appalachia in billion-dollar land grab that could redefine farms, forests, and data centers. Strategic positioning for what's coming.

Deepfakes & Bot Proliferation

Soon impossible to spot the difference between real and fake videos. No barriers to entry for creating deepfakes with continual tech advances. People not awake will struggle—they'll rely on five senses which can be easily deceived, rather than psychic senses.

- **2026: Year You Get Fooled**

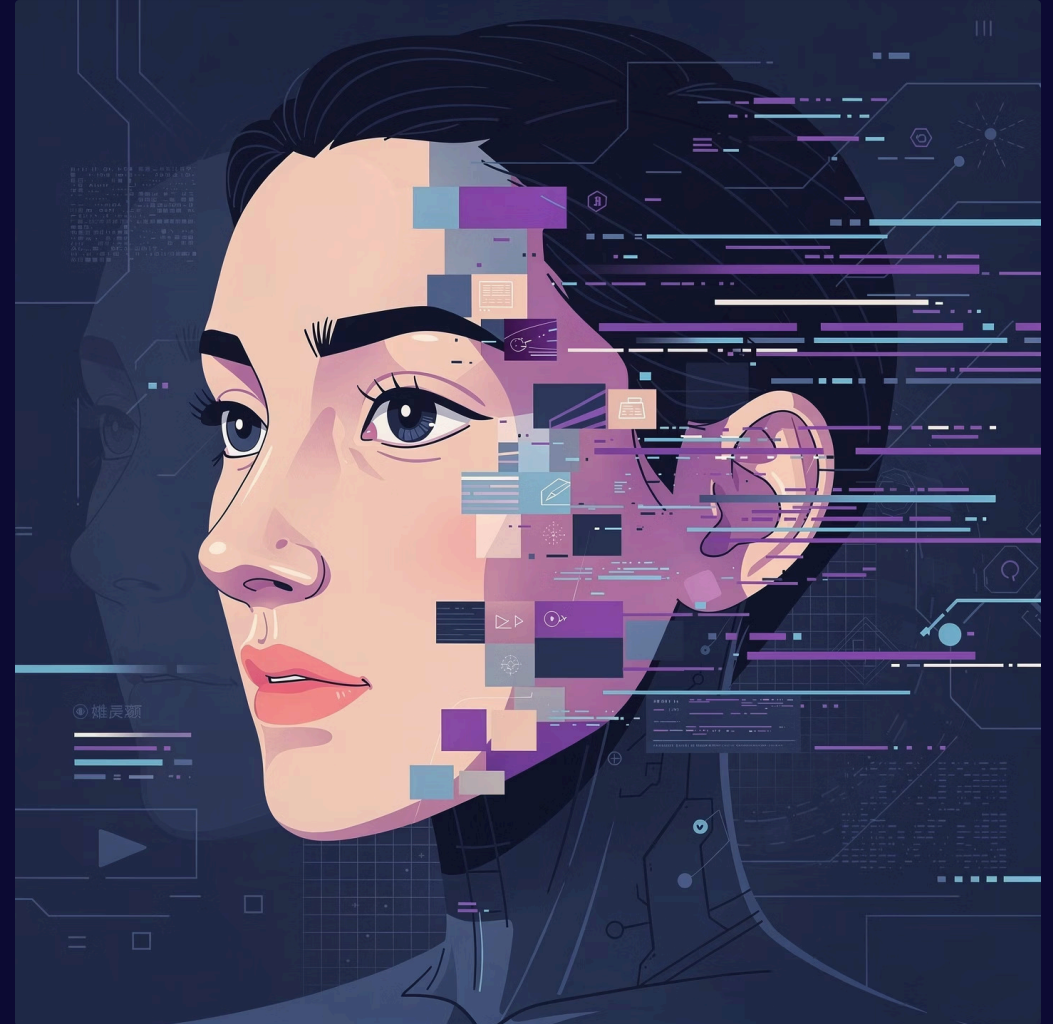

Fortune magazine warns deepfakes will reach unprecedented sophistication

- **New Laws Target AI**

States implementing regulations around deepfakes and AI-generated content

- **Digital ID Push**

Combining deepfakes, assassinations, and regulation to justify digital identity systems

2026 Disruption Preparedness Checklist

Prepare, don't panic. Build resilience and stay awake. This comprehensive checklist covers cyber risk, outages, geophysical events, supply-chain shocks, and policy volatility.

1

Money & Banking

- Keep 1-2 months expenses in accessible buffer
- Split risk across two banks
- Reduce high-interest debt
- Keep offline plan: printed account numbers, key contacts

2

Cloud & Cyber

- Enable 2FA everywhere
- Monthly offline backups of critical files
- Non-cloud copy of important documents
- Don't reset passwords through links during disruptions

3

Health & Medicine

- Keep prescription continuity buffer
- Maintain health stability: sleep, hydration, stress management
- Follow one trusted medical source
- Don't doomscroll health scares

4

Home & Basics

- 7-14 day buffer of essentials
- Power plan: surge protector, charging bricks, "lights out" kit
- Water, shelf-stable food, batteries, flashlight

Final Message: Prepare

Build resilience. Stay awake. Your nervous system is your best early-warning system.

These predictions aren't about fear—they're about awareness. The convergence of cyber stress, undersea warfare, solar activity, financial instability, and consciousness expansion creates unprecedented challenges and opportunities.

Build Resilience

Follow the disruption checklist and prepare systematically

Stay Awake

Develop psychic senses beyond the easily-deceived physical five

Build Community

Know your "two people" plan and create local support networks

Trust Intuition

Your inner guidance system will navigate what's coming

The old world is burning down. The new world is being built. Position yourself wisely, stay conscious, and remember: this is transformation, not destruction.
